

The University of Iowa College of Nursing Bachelor of Science in Nursing (BSN) Student Outcomes. Graduates of the BSN programs will be able to:

- I. Ensure delivery of safe quality nursing care to diverse individuals, families, groups, communities and populations throughout the lifespan and across systems of care.
- II. Integrate theoretical and scientific knowledge gained from natural and social sciences and culture, society and the liberal arts into nursing.
- III. Demonstrate leadership and teamwork skills across systems of care to promote quality health outcomes.
- IV. Use the best evidence from multiple ways of knowing to inform practice to make clinical judgments, solve problems and address systems improvements.
- V. Demonstrate a basic understanding of how health care policy, regulation, resource stewardship, technology and economics impact nursing practice and quality health outcomes.
- VI. Use effective interprofessional communication and collaboration strategies to promote quality health outcomes.
- VII. Apply health promotion and disease prevention strategies to diverse individuals, families, groups, communities and populations to promote quality health outcomes.
- VIII. Demonstrate professional values fundamental to the discipline of nursing.
