UI Alumni Association Distinguished Alumni Awards

Mrs. Sally Mathis Hartwig will be receiving the Distinguished Alumni Award for Faculty-Staff Achievement 2015 through the University of Iowa Alumni Association. This native Iowan from Dayton, Iowa earned her bachelor degree in nursing from the College of Nursing in 1975 after graduating from Iowa Methodist School of Nursing. Then she continued her education and earned a Masters in Nursing Service Administration from the College of Nursing in 1977. In her professional career, Mr. John Colloton notes Mrs. Mathis Hartwig has demonstrated “…exemplary qualities of leadership, professional achievements and impeccable character [that] align perfectly with the established eligibility criteria for the … Award”. In her career, she has developed an impressive record of nursing leadership and service to the profession nationally and internationally.

Ms. Leslie Williams will receive the Distinguished Alumni Award for Achievement 2015 through the University of Iowa Alumni Association. In her professional career, Ms. Williams has excelled as an investment advisor from coast to coast and internationally. She has developed an impressive record of leadership prowess in the biotechnology arena within the nation and the world at a time of financial instability.

Ms. Williams was born in Fort Dodge, Iowa and grew up in Gowrie, Iowa and received her baccalaureate degree from The University of Iowa College of Nursing in 1982. She recalls that when she interviewed at Iowa, the school spirit was exciting and palpable. In addition, she chose the College of Nursing because it offered a four-year Bachelors of Science program and it had (and continues to have) a reputation for being one of the top nursing programs in the country. Ms. Williams who is now the president and CEO of ImmusanT, a biotechnology company based in Cambridge, MA—has seen her career in health care go from the bedside to the lab…from directly administering patient care to delivering technological advancements in medicine.
