Informatics Cluster Hire Initiative

Recruiting Nurse Faculty in Informatics

The University of Iowa College of Nursing is seeking applications for a tenure-track faculty position for junior or senior faculty in nursing with a focus in informatics to contribute and/or lead research teams across campus by bringing an understanding of informatics and data science along with expertise in clinical areas such as health care systems, symptom management of chronic conditions, and health care in at-risk populations. As a major research university, we are well positioned to support faculty candidates who have existing or developing research programs in informatics to support the mission of the college and contribute to the teaching, research, and service initiatives. The college is committed to promoting diversity and inclusion in achieving our education, research, service and practice missions, as demonstrated through our Pillars of Diversity.

The Iowa Informatics Initiative is a bold, campus-wide initiative designed to foster new collaborations to open new research and scholarship opportunities across campus from health care to digital arts and humanities, and to educate and train the next generation workforce with the skills to transform information into knowledge and actions. Participation in the Informatics Cluster facilitates collaborations with experts in various fields relevant for successful research in this expanding field. The successful candidate for this position will contribute to academic programming on informatics content in the undergraduate and graduate programs in the college, participate in the interdisciplinary activities of the Informatics Cluster Hire, collaborate with the Interdisciplinary Graduate Program in Informatics (IGPI) and provide the liaison between the College of Nursing faculty with research activities related to informatics and data science and the informatics cluster.

As a leader in nursing education, research, and practice innovations, the UI College of Nursing has received national recognition by U.S. News & World Report, ranking several of its graduate programs among the best in the nation. External funding is robust, and in 2015, the college ranked 20th in the nation in NIH funding. Areas of research excellence include gerontology, health systems improvement and pain, palliative care and symptom management. Emerging areas of emphasis include management of chronic conditions and health promotion in at-risk populations. Cross cutting approaches include applied genomics/omics/biomarkers, health information technology and community engagement.

Education Requirements:

• Earned doctorate in nursing or a doctorate in a related field
• Demonstrated expertise in a defined area of nursing

Preferred Qualifications:

• Graduate degree in nursing from an accredited school of nursing
• Recognized record of accomplishment via publication in leading journals
• Ability to establish or maintain an extramurally-funded research program
• Eligible for or currently licensed to practice nursing in the state of Iowa

Application materials include a letter describing relevant experiences and interests; current curriculum vitae; and contact information of three references (contacted only with permission). To apply, visit Requisition # 69767 at http://jobs.uiowa.edu

The University of Iowa is an equal opportunity/affirmative action employer. All qualified applicants are encouraged to apply and will receive consideration for employment free from discrimination on the basis of race, creed, color, national origin, age, sex, pregnancy, sexual orientation, gender identity, genetic information, religion, associational preference, status as a qualified individual with a disability, or status as a protected veteran. For additional information, contact the Office of Equal Opportunity and Diversity, 319-335-0705.
