Distinguished Scholar in Advancing Science in Pain and Palliative Care

**Description:** The faculty member appointed as Distinguished Scholar in Pain and Palliative Care will provide leadership in advancing research and scholarship that emphasizes innovations in pain and/or palliative care. Area of expertise may address emphases such as decision-making, communication, symptom management, and system issues. This exciting opportunity is for a senior faculty member who has a distinguished career in palliative care or pain research. Resources to support development work and advance scholarship are provided.

**Expectations:** The faculty named as Distinguished Scholar in Advancing Science in Pain and Palliative Care will:

- Maintain continued funding that supports advancements in pain and/or palliative care research.
- Mentor faculty and students in pain and palliative care research to advance developing and collaborative programs of research.
- Facilitate interdisciplinary and interprofessional collaborations to advance team science scholarship in pain and palliative care, including partnering with University of Iowa (UI) programs and initiatives relevant for pain and palliative care research and clinical advances (e.g. University of Iowa Hospitals and Clinics (UIHC) Palliative Care Program; UIHC Chronic Pain Center; College of Medicine (COM) T32 Pain Training).
- Demonstrate and advance national engagement and leadership in professional associations and federal bodies of importance for pain and palliative care scholarship (e.g. American Pain Society, Hospice and Palliative Nurses Association, American Academy of Hospice and Palliative Medicine, Oncology Nursing Society).
- Sustain and enhance reputation of Pain and Palliative Care research excellence at Iowa through national recognition of scholarship in pain and palliative care and dissemination of outcomes in high impact venues.

**Education Requirements:**
Earned doctorate in nursing or a doctorate in a related field with a graduate degree in nursing from an accredited school of nursing.

**Required Qualifications:**
Focused area of research in improving pain and palliative care outcomes; demonstrated excellence of scholarship in pain and palliative care research through funding and publication record; commitment to interdisciplinary collaboration; and must be eligible for or currently licensed to practice nursing in the State of Iowa.

Applications should be submitted online at jobs.uiowa.edu under requisition #65401, including a letter outlining interest, research objectives and teaching experience, curriculum vitae, and three references (to be contacted only with permission).
