RE: College of Nursing Collegiate Review

University of Iowa policy requires that all colleges and units undergo regular reviews at least every seven years (*Policy Manual*, [Part II 28.2](#)). To comply with this policy, a committee was directed to review the College of Nursing in March 2025. The committee's final report, the college's self-study and factual corrections to that report, and the provost's recommendation letter are now complete and have been submitted to College of Nursing administration and the Office of the President. These materials have also been posted to the college's [Accreditation & Collegiate Review](#) webpage.

The review commends the College of Nursing for its commitment to research excellence and the positive educational impact it has had on the state's nursing workforce. I want to express my sincere appreciation to the dedicated faculty and staff who contribute to those efforts.

I also want to give a special thank you to the self-study and review committees for their hard work to make this a successful review.
